PROFILE:

Information Systems student at BINUS University with hands-on experience in full-stack web development, AI integration, and Web3 technologies. Proficient in Next.js, TypeScript, Node.js, and PostgreSQL, with a track record of building end-to-end decentralized and AI-driven applications.

FEATURED PROJECTS:

Forj - Web3 Freelance Marketplace
Next.js · Solidity · Base · Privy

- Built a Web3 freelance marketplace with smart-contract-based escrow, connecting milestone-based work, wallet authentication, and decentralized payment workflows.
- Developed and integrated Solidity smart contracts on Base, handling escrow logic and on-chain transaction flows from the web application.
- Implemented embedded wallet integration and USDC-based settlement workflows, connecting the frontend product experience with blockchain infrastructure.

Elara - AI Career Platform
Next.js · TypeScript · AI · Job APIs

- Built and deployed a full-stack career platform combining job discovery, CV management, application tracking, and AI-assisted career workflows.
- Integrated real job data, authentication, PostgreSQL-backed workflows, and Gemini-powered job analysis, taking the application from product design through production deployment.
- Implemented automated unit, database, and end-to-end testing to improve reliability across core application workflows.
